

Final Stop to Nuclear :

Why It matters

I, **Aline Pauchard**, associated with **ZERO NUCLEAR NETWORK**, am calling you to demand :

- 1) That the French state, which owns **85%** of **AREVA**, publicly admit its responsibility regarding the abominable and sustainable health and social consequences of the **Fukushima Daiichi** nuclear disaster.
- 2) That the French citizens who suffer the consequences of all nuclear facilities, who pay the real estate equity consequences of the illegal discharges of radionuclides from nuclear facilities, and who pay the health consequences with their flesh, be compensated as soon as possible.
- 3) That **France** cease to endanger its friends and neighboring populations through the continuation of its unilateral, irresponsible and criminal nuclear policy.
- 4) That the **International Atomic Energy Agency** immediately cease to accelerate and enlarge the contribution of atomic energy in the solar system.
